RATGATE

OUR STORY

Founded in 2018, RatGate has positioned itself at the forefront of pest control innovation, bringing to the market a unique solution to an age-old problem – keeping rats out of properties.

RatGate's patented non return valves are designed to fit seamlessly within drainage systems, allowing water and waste to flow freely, whilst at the same time stopping rats from pushing against them and gaining access to properties.

Part of the BPCA, RatGate is fast becoming the industry standard thanks in part to its patented liftable flap mechanism, which allows easy access to drains for maintenance purposes, a first, and only, in the market.

THE UK RAT PROBLEM

WHAT ARE THE FACTS?

There are over 10 million brown rats in the UK alone.

They have a natural instinct to gnaw, and can, and will, easily chew through wood, plastic, wiring, brick and mortar.

Rats transmit diseases such as Weil's disease, which can cause serious health issues for humans.

It is estimated that 70% of the UK rat population has become resistant to conventional poisons.

HOW RATS GAIN ACCESS TO PROPERTIES

Whilst drains play an essential role in managing the flow of water and waste, they unfortunately also provide rats with the perfect environment to live, breed and discreetly enter properties.

Rats are skilled at navigating their way through drains and squeezing through tiny openings in pipes, such as cracks, gaps or holes.

**PREVENTION IS BETTER
THAN CURE**

A RatGate is a highly effective device that fits into drains and keeps rats out of properties.

The device is humane, poison free and environmentally friendly, and manufactured in 4" (110mm), 6" (160mm) and 9" (225mm) versions that fit clay, plastic and cast iron drainage pipes.

RODENT PREVENTION DEVICES

HOW THE RATGATE WORKS...

Once fitted into the drain, the device opens with the direction of flow, allowing water and waste to pass effortlessly through it, without allowing rats to push against it and gain access to the property.

UNIQUE FEATURE

REMOTE OPERATION

One of the unique features of the RatGate is its patented liftable flap mechanism.

The RatGate is the only product on the market that allows you to open the flap from the top of the manhole, a crucial feature for any rodding or camera investigations that may be needed in the future.

This innovative feature means that there is no need to remove the RatGate from the drain whilst work is being undertaken.

THE RATGATE POLE

MAKING INSTALLATION EFFORTLESS

To make installation even simpler, and to allow fitters to access tight drains, we also developed the RatGate Installation Pole.

The RatGate Pole extends to 2.4m, with accessories available for fitting 4 inch and 6 inch RatGates.

RatGate
RODENT PREVENTION DEVICES

Easy to Install

Only basic tools are required to install a RatGate device.

Maintenance Free

Once a RatGate device is fitted there is no maintenance other than a periodic check.

Tough Construction

The RatGate is made from high grade, laser cut stainless steel.

Remote Operation

The RatGate is the only device on the market that allows you to lift the flap from the top of the manhole.

Multi-Directional

The RatGate can be installed in either the up or down stream direction of flow.

Humane

The device is humane, poison free, and environmentally friendly.

WHAT OUR CLIENTS

SAY ABOUT RATGATE

The RatGate is of the highest quality, simple to install, and unique in that you can operate the flap without having to remove the device.

We are proud to stock the RatGate, which has proved extremely popular amongst our nationwide client base.

RatGates are without a doubt the best product on the market; easy to install, durable, and our customers find the liftable flap invaluable.

The RatGate is so well made and is so easy to use with the pole and clamp accessories. We would highly recommend this product to all professional pest controllers.

Great quality pieces of kit with superb aftercare support. The liftable flap mechanism is also a complete game changer.

We have fitted 1,000s of devices over the last few years and have to say this comes out a clear winner. We would highly recommend this product.
